

Oncology Nurse Navigator Summit ILNA Cheat Sheet

SESSION	OBJECTIVES	NCPD	ILNA POINTS	ILNA CATEGORIES
Keynote- The Power of Intra-Professional Collaboration	Identify advantages for intra-professional collaboration in oncology nursing	0.5	0.5	Oncology Nursing Practice Professional Practice/Performance Nursing Practice
Optimizing Outcomes in Low-Risk Myelodysplastic Syndromes	<p>Recognize the biologic subtypes, risks, prognosis and treatment challenges associated with low-risk MDS.</p> <p>Use guidelines and clinical data to evaluate new and emerging therapies for low-risk MDS to inform goal-directed treatment selections.</p> <p>Implement evidence-based collaborative strategies to identify, monitor and manage adverse events associated with low-risk MDS.</p>	1	1	Symptom management, Palliative Care, Supportive Care Treatment
Managing Unmet Needs in a Changing World	<p>Examine 2021 Report to the Nation on the Status of Cancer and its impact on oncology nursing practice in 2022 and beyond.</p> <p>Identify consequences to oncology patients and nurses of peri-pandemic status.</p> <p>Apply incident preparedness, telehealth, eHealth apps and other methodologies to the new era of oncology nursing practice.</p>	1	1	Oncology Nursing Practice Professional Practice/Performance Nursing Practice
Caring for Patients with Relapsed or Refractory Multiple Myeloma	<p>Discuss the pathophysiology of and distinctions between relapsed and refractory multiple myeloma.</p> <p>Compare approved drug classes for relapsed/refractory multiple myeloma to identify patients with relapsed/refractory multiple myeloma for whom these agents may be appropriate.</p> <p>Collaboratively monitor and manage adverse events associated with agents used for relapsed/refractory multiple myeloma.</p>	1	1	Symptom management, Palliative Care, Supportive Care Treatment
Optimization of PARP Inhibitor for Prostate and Ovarian Cancer	<p>Compare and select PARP inhibitor guideline-directed therapy for advanced ovarian cancer based on patient characteristics and clinical data.</p> <p>Compare and select PARP inhibitor guideline-directed therapy for advanced prostate cancer based on patient characteristics and clinical data.</p> <p>Apply a collaborative approach with patients to manage adverse events associated with PARP inhibitor therapy for advanced ovarian and prostate cancers.</p>	1	1	Symptom management, Palliative Care, Supportive Care Treatment

HER2-Positive Metastatic Breast Cancer: New Options, New Hope	<p>Discuss tumor genesis, molecular characteristics, and molecular testing for HER2-positive metastatic breast cancer.</p> <p>Use guidelines and clinical data to evaluate new and emerging therapies for HER2 positive metastatic breast cancer to inform goal-directed treatment selections.</p> <p>Implement evidence-based collaborative strategies to identify, monitor and manage adverse events associated with HER2 positive breast cancer therapies.</p>	1	1	Symptom management, Palliative Care, Supportive Care Treatment
Anticipate and Effectively Manage Immune-Related Adverse Events	<p>Recognize the immunotherapy classes and agents that cause common and life-threatening adverse events in patients with cancer.</p> <p>Compare the various immunotherapies and their adverse events profiles to identify patients who are likely to experience adverse events related to their treatments for cancer.</p> <p>Apply a collaborative approach with patients to anticipate, monitor and manage adverse events associated with immunotherapies used in the treatment of various cancers.</p>	1	1	Symptom management, Palliative Care, Supportive Care Treatment
Understanding Racial and Ethnic Disparities in Triple Negative Breast Cancer: How Nurses Can Balance the Scales	<p>Recognize the biologic, risk, prognosis, and treatment challenges associated with TNBC</p> <p>Identify key non-biologic factors associated with poorer outcomes for racial/ethnic identities disproportionately affected by TNBC</p> <p>Implement collaborative strategies to address disparities and enhance the quality of care in patients with TNBC</p>	1	1	Oncology Nursing Practice Professional Practice/Performance Nursing Practice Care Coordination
The Art of Patient Education	<p>Apply concepts of healthcare literacy, readiness to learn, anticipatory education, and just in time learning to inform collaborative goal setting with patients with cancer.</p> <p>Identify barriers to effective patient education and methodologies to mitigate them.</p>	1	1	Oncology Nursing Practice Professional Practice/Performance Nursing Practice Psychosocial
Updates in the Management of Urologic Cancers	<p>Compare and select guideline-directed therapy for advanced bladder cancer based on patient characteristics and clinical data.</p> <p>Apply a collaborative approach with patients to manage adverse events associated with treatment for advanced bladder cancer.</p> <p>Compare and select guideline-directed therapy for advanced RCC based on patient characteristics and clinical data.</p> <p>Apply a collaborative approach with patients to manage adverse events associated with treatment for advanced RCC.</p>	1	1	Symptom management, Palliative Care, Supportive Care Treatment

ONN Practice Expanding Our Reach, Overcoming Barriers	<p>Identify challenging factors for ONN practice in urban and rural settings.</p> <p>Examine the pros and cons of paid vs. volunteer models of navigation.</p> <p>Incorporate ONN competencies, including the use of acuity tools in successful ONN practice.</p>	1	1	<p>Oncology Nursing Practice</p> <p>Professional Practice/Performance</p> <p>Nursing Practice</p> <p>Care Continuum</p>
Cancer Screening: Current Guidelines, Challenges, and Disparities	<p>Summarize, compare, and contrast current cancer screening guidelines for people at average and increased risk for certain cancers.</p> <p>Recognize the impact of the COVID-19 pandemic on cancer screening rates and delayed diagnosis.</p> <p>Identify challenges and barriers to cancer screening for marginalized populations that result in increased health disparities.</p> <p>Implement strategies to promote resources and recommendations for cancer screening guidelines based on age and risk.</p>	1	1	<p>Care Continuum</p> <p>Psychosocial</p>
Decision-Making at Care Transitions	<p>Discuss challenges that patients and families face during the phases of the cancer continuum beginning with pre-diagnosis.</p> <p>Review existential dilemmas that patients experience.</p> <p>Provide "best practice" for difficult conversations and patient preferences.</p> <p>Identify interventions for ethical discussions at end of life.</p>	1	1	Cancer Continuum
Targeted Therapy for NSCLC: New Frontiers	<p>Discuss tumor genesis, molecular characteristics, and broad molecular testing for NSCLC.</p> <p>Compare and select guideline-directed targeted therapies for NSCLC based on patient and tumor characteristics and clinical data.</p> <p>Implement evidence-based collaborative strategies to identify, monitor, and manage adverse events associated with targeted therapies for NSCLC.</p>	1	1	Treatment
Managing Challenging Cancer Symptoms: The Chronic, the Acute and the Urgent	<p>Recognize the pathologic foundations of challenging key disease-related common and life-threatening adverse events in patients with cancer.</p> <p>Apply a collaborative approach with patients and the multidisciplinary team to anticipate, monitor, and manage challenging key disease-related common and life-threatening adverse events associated with a cancer diagnosis.</p>	1	1	Symptom Management, Palliative Care

Clinical Advantages: Targeting BTK in CLL	<p>Discuss the pathophysiology associated with molecular targets in patients with newly diagnosed and relapsed/ refractory CLL.</p> <p>Compare the various approved and investigational BTK inhibitors to identify patients with newly diagnosed and relapsed/refractory CLL for whom these agents may be appropriate.</p> <p>Implement evidence-based strategies to identify, monitor, and manage adverse events associated with BTK inhibitors for patients with CLL.</p>	1	1	Symptom management, Palliative Care, Supportive Care Treatment
Expert Panel Discussion: Case-based Practical Application	Apply competency-based collaborative practice strategies to oncology patient problems	1	1	Oncology Nursing Practice Professional Practice/Performance Nursing Practice Psychosocial
